PROFESSIONAL SKILLS

- LLM API & AI integration
- RAG · GraphRAG · Qdrant · Neo4j
- Multi-agent & automation
- Node.js · TypeScript · Next.js
- SQL · PostgreSQL · Prisma
- Dashboard · realtime BI
- Machine Learning · statistics
- Python · Pandas · Excel
- Infra · PM2 · Caddy · Git

LANGUAGES

- Vietnamese — native
- English — technical reading

CERTIFICATIONS

- Google Skills — Google Data Analytics · Machine Learning · Deep Learning · Math for AI

INTERESTS

- Machine-learning algorithm research
- AGI system architecture
- Kaggle competitions
- Market data analysis

NGUYỄN QUỐC VIỆT

AI APPLICATION ENGINEER

ARC Prize 2026 (ARC-AGI-3) — top 13.4% · 658/4,923 · solo

CAREER OBJECTIVE

I love data analysis and AI system architecture — and I build AI-powered apps that save businesses real hours. Over the past year I have designed, built and run **many production applications and systems (~640,000+ lines of code)** — AI CRM, a multi-agent AI platform, voice assistants — and competed in several **hackathons** and Kaggle contests, finishing ARC Prize 2026 (ARC-AGI-3) solo at **658/4,923 — top 13.4%** on an abstract-reasoning benchmark. What I am looking for now: remote, flexible AI work (10–40 h/week) in **model evaluation, rubric-based review and AI-assisted development**, where careful judgment and hands-on engineering turn into measurable model quality.

KAGGLE COMPETITIONS

CONTEST	RESULT	TYPE · SCALE
ARC Prize 2026 — ARC-AGI-3	**top 13.4%**	**AI Reasoning · 4,923 teams · 658/4,923 · final ranking**
Kaggriculture	**top 28.7%**	Simulation · 10,148 teams · 2,915/10,148
Biohub — Cell Tracking	**top 33.8%**	Research · Code Competition · 3,947 teams · 1,332/3,947

All 3 contests entered solo — handled the full analysis, modeling and submissions alone.

WORK EXPERIENCE

1 · TMO — Multi-Agent AI Platform (open source · in active development)

github.com/vietnq130593-code/TMO · Next.js 16 · TypeScript 5 · Qdrant · Neo4j

- ✓ **Solo-built multi-agent platform:** 5-agent Code Team (Team Lead → 2 Generators → Verifier) · Skills Marketplace: Web Search, TTS/ASR, VLM, image generation
- ✓ **GraphRAG knowledge base:** PDF → entities/relations → Neo4j graph + Qdrant vectors · hybrid search (vector + graph + RRF fusion) with LLM answers · D3 graph viz
- ✓ **Production infra:** multi-LLM pool (NVIDIA NIM · Mistral · OpenRouter · Cerebras) slot-based rotation & fallback · token tracking · Bun + PM2 + Caddy

2 · LEVEL 1 HAIRCARE CRM — CRM & AI platform for a haircare chain (running in production)

~341,000 lines of TypeScript · 225 API routes · Supabase (Auth + PostgreSQL) · PWA

- ✓ **4,199+ real customers:** team & channel management, automated retention, full-catalog Excel export for periodic reporting
- ✓ **AI engine (~22,000 lines):** ANN no-show & 30-day churn prediction · NAS architecture search · RL Q-table · configurable GLM LLM
- ✓ **Voice consulting assistant** (3-step ASR, runs offline) · **consulting quality scoring by rubric**
- ✓ **POS cashiering · 9-module BI · operations dashboard** · R2/S3 storage

3 · MORE PRODUCTS & HACKATHONS

- ✓ A portfolio of additional production apps and AI systems beyond the two flagships · participant in several hackathons

EDUCATION

Google Skills Program — Google

- ✓ **Curriculum:** Data Analytics (collection from SQL/Excel/API/web scraping → cleaning → analysis → visualization) · Machine Learning (confusion matrix, classification & regression metrics) · Deep Learning (neural networks, backpropagation, activation functions) · Math for AI (linear regression, loss functions)
